Lot 24 – A2A2
Lot 25 – A1A1
Lot 26 – A1A2
Lot 27 – A2A2
Lot 28 – A2A2; pregnant
Lot 29 – non-Bangs Vaccinate; On Oxytocin; 66# 4.2% 3.4%; 214,000 SCC
Lot 30 – Open and was given GNRH on 4/29; On Oxytocin; Bangs Vaccinate;
63# 4.4% 3.3% 15,000 SCC; 3/4-blind in right rear
Lot 31 – Bangs Vaccinate; pregnant w/ultrasounded bull; 83# 5.4% 3.2%; 20,000 SCC
Lot 32 – non-Bangs Vaccinate; 59# 4.4% 2.8% 230,000 SCC
Lot 33 – Pregnant; non-Bangs Vaccinate; on Oxytocin; 38# 4.5% 3.5% 214,000 SCC
Lot 34 – Selling open, aborted 10 days ago, vet says she is cleaning up good;
non-Bangs Vaccinate; 46# 5.1% 3.7% 200,000 SCC
Lot 35 – non-Bangs Vaccinate; Selling Dry
Lot 36 – non-Bangs Vaccinate; on Oxytocin; has NOT been turned dry yet; Pregnant with an ultrasounded heifer; 50# 5.4% 3.9% 330,000 SCC
Lot 37 – Leukosis Positive; on Oxytocin; 85# 5.2% 3.4% 15,000 SCC
Lot 38 – Leukosis Positive; Selling Dry
Lot 39 – Leukosis Positive; Given GnRH on 4/29-vet suggests giving lut in 1 week; 66# 3.8% 3.1%
14,000 SCC
Lot 40 – non-Bangs Vaccinate; on Oxytocin; 65# 4.7% 3.4% 33,000 SCC
Lot 41 – Leukosis Positive; on Oxytocin; Re-bred 4-25-16 to Novak; 102# 4.6% 3.1% 115,000 SCC
Lot 42 – Bangs Vaccinate; linear traits listed for dam are incorrect, please refer to Lot 41
Lot 43 – scratch

Lot 44 – Pregnant; non-Bangs Vaccinate; 72# 4.7% 3.6% 81,000 SCC
Lot 45 – Leukosis Positive; 58# 4.2% 3.2% 115,000 SCC
Lot 46 – Bangs Vaccinate
Lot 47 – On Oxytocin; 44# 4.8% 3.4% 566,000 SCC
Lot 48 – Tattoo in both ears is 59M; Leukosis positive; on oxytocin; Bangs Vaccinate; 54# 5.3% 3.6% 100,000 SCC
Lot 49 – Leukosis Postitive; on Oxytocin; Bred 4-20-16 to Novak; 74# 5.5% 3.6% 66,000 SCC
Lot 50 – Leukosis Positive; on Oxytocin; 46# 5.4% 3.5% 700,000 SCC; Right Rear currently being Treated with Spectromast
Lot 51 – Bangs Vaccinate; Johnes Vaccinate; 33# 6.0% 3.5% 370,000 SCC
Lot 52 – Bangs Vaccinate
Lot 53 – Pregnant-carrying twins; non-Bangs Vaccinate; 38# 6.1% 4.0% 132,000 SCC
Lot 54 – Leukosis Positive; non-Bangs Vaccinate; 81# 3.9% 3.2%; SCC of 1 on linear 1-9 scale With 1 being good
Lot 55 – Leukosis Positive; non-Bangs Vaccinate; Selling Dry
Lot 56 – Leukosis Positive; non-Bangs Vaccinate; 44# 5.8% 3.9% SCC of 2 on linear 1-9 scale
Lot 57 – Scratch
Lot 58 – Leukosis Positive; non-Bangs Vaccinate; Sells Open; 69# 3.8% 3.1%; SCC of 2 on linear 1-9 scale
Lot 59 – Scratch
Lot 60 – Scratch
Lot 63 – on fly sheet; non-Bangs Vaccinate; 63# 3.9% 2.6% 140,000 SCC
Lot 64 – on fly sheet; non-Bangs Vaccinate; 48# 4.0% 2.6% 66,000 SCC

Statement on Leukosis Positive Cows:

In December 2015, GMS added the requirement that all consignments be tested for Bovine Leukemia Virus (BLV), more commonly known as Leukosis. After consulting with a few veterinarians and another breed association, it was decided that animals testing positive will be allowed to sell, but the positive tests will be announced.

Two vets we consulted with said that it is legal for interstate health papers to be written on animals testing positive for BLV because it is not a regulated disease and there are no restrictions for interstate travel of animals in relation to the BLV test results.

Clean needles, colostrum and breeding sleeves are some of the effective management tools that can be used to prevent the spread of the disease.

More detailed information about BLV may be found on the following website:
